

Insulating Sleeve

The insulation sleeve is used at straight and angled clamping ring connection points. It provides the necessary insulation and serves at the same time for mechanical protection as well as protection against contact of the connection point.

FEATURES

- Straight and angled (90°) clamping ring connection points
- Excellent thermal and electrical insulation
- High chemical resistance
- Temperature resistance from -60 ... 200°C
- Easy handling and installation

Insulating Sleeve

TECHNICAL DATA

Clamping ring size	6 mm, 8 mm, ¼"
Material	Silicone (Silicone elastomer with additives)
Colour	Black
Inner diameter	15 mm straight sleeve and 18 mm angled sleeve
Length	30 mm, 70 mm und 58 mm (Height at angled sleeve)
Temperature Range	-60 ... 200 °C

DIMENSIONS
